NATIONAL AGRICULTURAL LIBRARY

MAR 4 - 1968

CURRENT SERIAL RECORDS

Agricultural Research Service

UNITED STATES DEPARTMENT OF AGRICULTURE

The National Poultry Improvement Plan became operative July 1, 1935, with the approval of the Secretary of Agriculture and under the authority of an appropriation made by Congress for the United States Department of Agriculture, to be used in cooperation with State authorities in the administration of regulations for the improvement of poultry, poultry products, and hatcheries. Authority for the administration of the Plan is now contained in the Department of Agriculture Organic Act of 1944, as amended (7 U.S.C. 429).

Provisions of the Plan are changed from time to time to conform with the development of the industry and with new information as it becomes available. These changes are based upon recommendations made at the biennial National Plans Conference by official delegates representing participating breeders, hatcherymen, and flock-owners from all cooperating States. Current regulations of the Plan are described in U.S. Department of Agriculture Miscellaneous Publication No. 739, "The National Poultry and Turkey Improvement Plans." The publication is available from Official State Agencies or upon request to the Animal Husbandry Research Division, Beltsville, Maryland 20705.

Information in this publication was compiled by the Animal Husbandry Research Division, Agricultural Research Service, U.S. Department of Agriculture. Trade names are mentioned in this publication solely to provide specific information. The mention of such names does not constitute a guarantee or warranty of the product.

# HATCHERIES AND DEALERS PARTICIPATING IN THE NATIONAL POULTRY IMPROVEMENT PLAN

## INTRODUCTION

The hatcheries and dealers listed in this publication are participating in the National Poultry Improvement Plan, according to reports submitted by the Official State Agencies. The list of participants is published for the purpose of developing greater efficiency in the operation of the Plan. Additional information regarding participants may be obtained by writing to the Department or to the Official State Agency in their respective State.

This publication is revised each year because of frequent changes in participation and the need for inspectors, hatcherymen, dealers, and others to have up-to-date information. In addition, the list is corrected several times during the year by issuing supplements.

Table 1 lists the participants by States and, in addition, shows the classifications of participants' products, the contact representative, and the Official State Agency recognized by the U.S. Department of Agriculture to co-operate in administration of the Plan.

Tables 2, 3, and 4 are in the Appendix at the end of the publication. Table 2 lists the breeders of "U.S. Performance Tested Parent Stock" and the stock they produce, and the test years in which the stock qualified for the classification. Table 3 lists strain and trade names alphabetically and their code numbers. Table 4 lists strain and trade names numerically according to their code numbers.

## EXPLANATION FOR TABLE 1

### Approval Numbers

In table 1, numerals preceding the name of the State, together with those preceding the name of each participant, constitute the participant's approval number. For example, the approval number for the first hatchery listed under Alabama is 64-15. The No. 64 represents the State of Alabama; No. 15, Alabama State Hatchery, Ashford Highway, Dothan 36302. These assigned numbers may be used by participants on shipping labels, certificates, invoices, and other documents for identification. They may also be used as reference numbers for shipments to Member States of the European Economic Community.

### Hatching Egg Capacity

Figures in the column immediately after participants' names and addresses refer to the hatching egg capacity of hatcheries according to manufacturer's rating, including setting and hatching trays. Letter symbols in this column refer to products dealers sell, as follows: E, hatching eggs; C, chicks; and E and C, eggs and chicks.

### Kinds of Stock

Poultry breeds, varieties, or types of stock produced by NPIP participants are identified in table 1 by letter symbols as follows:

a--White Leghorn	g--Black Australorp	s--Egg production stocks
b--Rhode Island Red	h--Cornish	t--Meat production stocks
c--Barred Rock	j--California Gray	w--Bantams
d--White Rock	k--White American	x--Ducks
e--New Hampshire	r--Other breeds and	y--Geese
f--White New Hampshire	varieties.	z--Other birds

These letter symbols are shown in column 4 of table 1 combined with numerals, which identify the strain or trade names of participants' products. (See tables 3 and 4 in the Appendix.) Crosses are designated by combining the letter symbols and code numbers of both parent stocks, listing the male first.

All products shown in column 4 of table 1 meet the specific requirements for a "U.S. Pullorum-Typhoid Clean" classification. Additional classifications for which these products qualify are stated in column 5 by use of words or symbols, as follows: Approved, means "U.S. Approved"; Certified (E), "U.S. Certified for Eggs"; MG, "U.S. M. Gallisepticum Tested"; and None, that the products have only the "U.S. Pullorum-Typhoid Clean" classification.

# APPENDIX

## Explanation for Table 2

Table 2 is a list of poultry breeders and shows the stock they produce and the test years their stock qualified as "U.S. Performance Tested Parent Stock" for egg production, according to the random sample egg production test. Terms and abbreviations used in the table are explained as follows:

"Stock" is a term used to identify a specific breeding combination of chickens. These breeding combinations may include strain crosses, breed crosses, incrossbreds, or combinations of these.

Kinds of stock are identified in table 2 by use of letter symbols as follows:

BPR--Barred Plymouth Rock	WL --White Leghorn	BX --Breed Cross
NH --New Hampshire	WPR--White Plymouth Rock	IN --Incross
RIR --Rhode Island Red	Syn. --Synthetic	INX--Incrossbred
RIW --Rhode Island White		SX --Strain Cross

The commercial products (eggs and chicks) from the stocks listed in table 2 are eligible for the classification "U.S. Certified for Eggs."

TABLE 2.--Breeder, stock produced, and year in which the stock qualified as "U.S. Performance Tested Parent Stock" for eggs
